

## *OilOff RTU*

### A Ready To Use Biological Treatment for Removing Oil & Grease Contamination from all types of Hard Surface

***OilOff RTU*** This ready to use product needs no preparation or dilution and is ideal for treating problems quickly particularly where there is no readily available water supply.

It is a proprietary blend of bacterial spores, biodegradable surfactants and biostimulating agents.

***OilOff RTU*** is safe, quick acting and effective in removing oil, diesel, grease spills and stains from contaminated surfaces. Ideal for electricity sub-stations, transformer bays, joint bay excavation and repairs, rail-track ballast, fuelling points, engineering shop floors, petrol forecourts, garages, parking bays, concrete drives and block floor paving areas. Instantly emulsifies free-floating oil and iridescence on contaminated water areas. Bacterial activity of the product naturally biodegrades the hydrocarbon-based contaminants.

***OilOff RTU*** Use in footbaths to clean wellingtons and protective footwear to prevent spreading of oil contamination on working sites. Can also be used to clean down oily equipment, tools and vehicles. Shortens clean-up times, increases contaminant bioavailability and initiates biodegradation in interceptor systems and when rinsed off to foul drains or soil areas.

#### Features

- Inoculates contaminations with bacteria and essential microbial nutrients.
- Cleans surfaces of oil spills and stains.

- Cleans oily equipment, vehicles and tools.
- Contains no petroleum distillates or solvents.
- Reduces fire risks and slip-hazards.
- Enhances biodegradation above and below ground surface when used as recommended.
- No removal or replacement of contaminated materials is necessary.

#### Direction For Use

Where deposits have accumulated over time, if possible scrape off any solid build up. For optimum results, brush product into the affected area and allow *OilOff RTU* to work for 20 – 30 minutes before rinsing off manually or just simply brush away the emulsion. Ensure area being cleaned remains damp during the treatment time. For very porous surfaces and deep ingrained stains a repeated treatment may be necessary.

#### • **Hard Surface Cleaning - Concrete, Asphalt and Porous Surfaces:**

For maximum result keep the treated area damp during hot conditions (do not let it dry out during application). Very heavy or old contamination may require a repeat treatment.

#### • **Painted Floors, Walls and Equipment:**

Apply ***OilOff RTU*** with a Pump up Sprayer or Mop and Bucket. Apply to contaminated areas and remove with brush cloth or mop.

• **Precautions and limitations:** Wear protective clothing (rubber gloves, eye protection). Pre-test new finishes by applying to a small area first. Best results are seen when applied to damp concrete surfaces.

## Health & Safety

**OilOff RTU** is classified as **NON-HAZARDOUS**.

Normal precautions should be taken when handling cleaning chemicals.

Avoid contact with skin and eyes.

Wash hands before consuming food or drink.

Bacterial organisms are naturally occurring and non-pathogenic

### Product Characteristics

Cell count 7.6 billion/gallon

PH need 10.4 - 10.7

Percent Volatile Nil

Solubility in water 99%

Boiling point > 212°F (100°C)

Flash Point Non Flammable

Appearance Cream to white liquid

Fragrance Floral perfumed

### Available Packaging

- 4 x 5 Litre Case
- 20 or 25 litre drums

### Storage and Handling

Store in a cool, dry place. Avoid inhalation.

Wash hands thoroughly with warm, soapy water after contact.

Avoid eye contact.
